

RENSOFT 713

Tissue softening agent

ADVANTAGES

RENSOFT 713 is a special liquid product, based on organic compounds, made for the application in the tissue processes to supply a special surface softening of fibres, the product does not affect the mechanical characteristic of paper.

- * Softening of the tissue paper
- * Not affect the mechanical properties of produced paper
- * Efficient also for recycled paper application

USE

Instructions: **RENSOFT 713** must be dosed as it is or diluted with water by using a static mixer, to facilitate the transport and the homogenisation.

Dosage: the suggested application point is the machine chest by ensuring good agitation. The dosage is between 1 ÷ 4 kg/ton paper, depending on the composition and on the expected results.

CHARACTERISTICS

Formulation:	organic compounds	pH:	2,0 ÷ 3,5
Appearance:	milky emulsion	Density at 20 °C:	1,00 ± 0,05
		Water solubility:	dispersible

USE AND PACKAGE REGULATIONS

Handling: see safety data sheet. Adopt the main cautions concerning chemical products handling.

Standard packaging in kg: drums of 200, tanks of 950 Kg

Storage: keep the container closed, protect from frozen.
